NGB SERIES

Models 35NGB, 40NGB, 50NGB and 60NGB

The NGB Series sets the new standard in removable gooseneck front-loading lowboy trailers. Loaded with all new features designed for greater safety, ease of operation and the ultimate in durability.

2006 NGB SERIES

The all new heavy hauling powerhouse!

Witzco Challenger Trailers has added significant design innovations to its new generation of removable gooseneck trailers, the NGB Series.

Automated gooseneck detachment and ride height adjustment make the NGB front-loading trailer the perfect choice for efficiency on the job, ease of operation and increased safety.

The new non-groundbearing model features a visible 4-position ride height adjustment **A**.

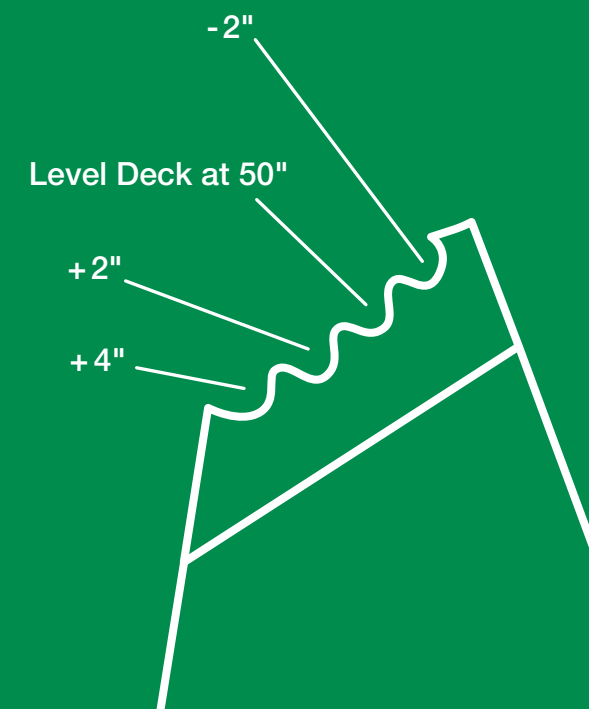

The four-position gooseneck adjusts the trailer's ride height in 2" increments, for everyday versatility demanded in the field... such as uneven terrain, high crowns and off-road operations.

An air-operated gooseneck safety lock is another new automated feature **B**, **C**. The locking pin actuator enhances operator safety, while assuring a reliable, secure trailer connection.

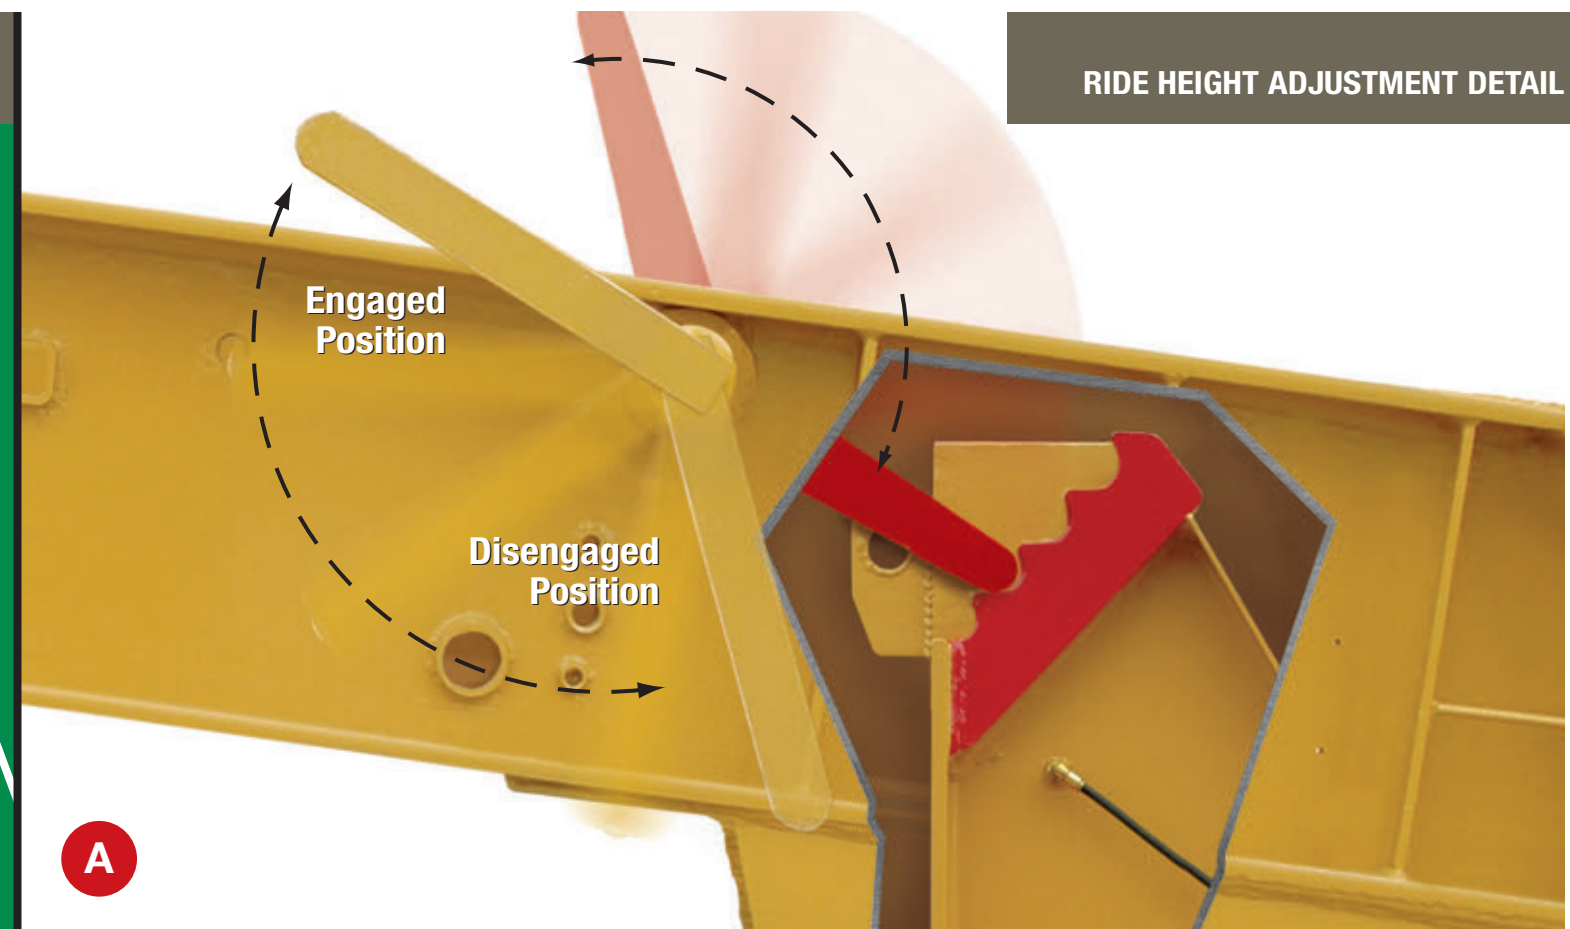

A single-pivot articulator is adjusted by twin 6" hydraulic cylinders, powered by a self-contained hydraulic system or an optional wetline. All trailer functions are controlled from the single operator station at the side of the gooseneck, **D** allowing safe and easy access to all attach/detach and ride height control functions.

Job after job, pound for pound, you won't find a better value for your dollar than a Witzco Challenger trailer. Performance-built to provide years of heavy hauling service and profitable returns.
